GitHub: https://github.com/PeytonCast

Summary:

Full Stack Web Developer certified in Google Analytics 4. Enjoys problem-solving, learning new technologies, and developing new technologies and ideas. Fast learner who's competent in good communication and working in a team environment.

Skills:

JavaScript, Google Analytics 4, jQuery, MySQL, NoSQL, MongoDB, Express.JS, Node.JS, Handlebars, HTML, CSS, Bootstrap, APIs, Heroku, Command-Line, C++

Projects:

Recipe-Finder,

The recipe finder is a simple website that will take in a keyword and return a recipe from the spoonAculer API based on the keyword. Then it will take that recipe and try to find it using the YouTube API to display the closest match.

It was a collaborative build between Peyton and another developer by the name of Jonathan Shogren.

Blog-Spot,

Blog spot is a full-stack application that Peyton built from scratch and launched on Heroku. It's complete with a Signup/Login feature, post routes, get routes, update routes, delete routes, and a functional database. Its purpose was to give people a platform to post small articles about whatever. As well as a way to comment on the article.

It presented challenges and was a great learning experience.
